0 of 0 review helpful One of the best linear algebra texts By m millman By doing almost everything in the space of real n tuples Murdoch runs the risk of ignoring the generality of the vector space concept But he more than makes up for this with simplicity and clarity of presentation Excellent intro for undergrads This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures

errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed w About the Author Marcus Tullius Cicero 106 43 BC was a Roman statesman and philosopher whose lifetime coincided with the decline and fall of the Roman republic His best known works include On the Republic On Duties and Treatises on Friendship and Old Age
